

## 1-Line, Bi-directional, Transient Voltage Suppressors

### Descriptions

The ESD3V3C250TA is a bi-directional TVS (Transient Voltage Suppressor). It is specifically designed to protect sensitive electronic components that may be subjected to ESD (Electrostatic Discharge), EFT (Electrical Fast Transients) and Lightning. It is particularly well-suited for cellular phones, portable device, digital cameras, power supplies and many other portable applications because of its small package and low weight.

The ESD3V3C250TA may be used to provide ESD protection up to 30KV Air, 30KV contact compliance to IEC61000-4-2, and withstand peak pulse current up to 5.8 A(8/20µs) according to IEC61000-4-5.

**Circuit diagram**

The ESD3V3C250TA is available in SOD-882 package. Standard products are Pb-free and Halogen-free.
