

1-Line, Uni-directional, Transient Voltage Suppressors

Descriptions

The ESD7H701TR is a uni-directional TVS (Transient Voltage Suppressor). It is specifically designed to protect sensitive electronic components that may be subjected to ESD (Electrostatic Discharge), EFT (Electrical Fast Transients) and Lightning. It is particularly well-suited for cellular phones, portable device, digital cameras, power supplies and many other portable applications because of its small package

The ESD7H701TR may be used to provide ESD protection up to $\pm 30\text{KV}$ Air, $\pm 30\text{KV}$ contact compliance to IEC61000-4-2, and withstand peak pulse current up to 100A ($8/20\mu\text{s}$) according to IEC61000-4-5.

The ESD7H701TR is available in DFN1610-2L package. Standard products are Pb-free and Halogen-free.
